

Dear,

Brickcom Corporation, a leading manufacturer of IP surveillance equipment and wireless surveillance solutions, announces that the Brickcom 3G [GOB-100A](#) Bullet series was nominated for the SAA 2011 awards.

The SAA 2011 awards were presented at Safety and Security Amsterdam. Over 20 products were nominated for the SAA 2011 awards, including products from companies such as Mobotix and Siemens. The Brickcom [GOB-100A](#) series was nominated for the Business Services Solutions category. Each category was judged based on innovation, applicability, price performance, and usability.

The Brickcom [GOB-100A](#) series is an outdoor network camera that uses a 3G SIM card to transmit video and audio data over a 3G network. This transmission option creates an innovative outdoor surveillance solution that frees users from the installation restrictions caused by internet infrastructure. The [GOB-100A](#) series adopts a megapixel sensor to deliver extremely clear and detailed images and the Smart Focus capability eases installation by allowing users to configure the zoom and focus setting remotely. With an IP67 certified outdoor enclosure, the GOB-100A can operate in temperatures ranging from -40°C to 60°C (-40°F ~ 140°F). The 3G data transmission and IP67 outdoor enclosure bring the IP surveillance benefit of remote access to a new level by enabling the GOB-100A to be placed in any location, regardless of environment, climate, or landforms.

About Brickcom Corporation

Brickcom Corporation is a leading manufacturer of IP surveillance equipment and a pioneer of wireless surveillance solutions. The company's comprehensive product portfolio includes a full line of IP network cameras, video servers, video management hardware and software, and a full range of networking and camera accessories.
